

# COSPAK

... has joined forces with international cork closure experts DIAM in order to supply premium quality technological cork solutions to the Australian wine industry

- The DIAM closure undergoes supercritical CO<sub>2</sub> extraction of TCA from raw cork materials to less than the quantifiable level of detection ( $\leq 0.5\text{ng/L}$ )
- DIAM is void of another 150 contaminants often found in natural cork after undergoing the supercritical process
- DIAM for still wine comes in two degrees of controlled permeability - 40 and 400 times less permeable than your average high grade natural cork.
- DIAM is available for still wine, sparkling wine and as a cork stopper:

## Cork Solution for still wine

- A consistent and reproducible cork
- A regular cork insertion
- Superior elastic return (97% at 30's)
- Available in 24.2mm x 38mm
- Available in 24.2mm x 44mm
- Available in 24.2mm x 47mm
- No leakage or seepage\*
- No dust problem\*
- Competitive pricing
- Branding opportunities available

\*Must follow producer's bottling guidelines.

## Cork Solution for sparkling wine

- No disc separation
- Easier compression and corking
- A regular cork insertion
- Reduced collapsing
- Available in 48mm x 30.5mm
- Easy opening
- Guaranteed dimensional recovery (mushroom form)
- Branding opportunities available

\*Must follow producer's bottling guidelines.

## Cork Stopper Solutions

- Maximum on-line performance
- Perfect insertion at bottling
- No dust or cloud risk
- Available in 26.5mm x 19.5mm
- Does not colour clear alcohol
- Easy opening and re-corking
- Excellent break resistance

\*Must follow producer's bottling guidelines.
